

## BETWEEN STUDIES AND CAREGIVING

*JOIN OUR INTERVIEWS, INNOVATION LABS, PODCAST SERIES AND/OR VIRTUAL EXHIBITION AS PART OF THE "INTERCARE" PROJECT*

Are you a student balancing your studies with caring responsibilities (e.g. to a parent, grandparent or friend)? Or do you receive care from a student? Either way, your experience matters!

In the "InterCare" project, we are looking for students between the age of 18 and 30 who provide care for an older person. We are also looking for care recipients who are at least 20 years older than the student, and who are interested in participating in an interview, innovation lab, virtual exhibition and/or a podcast series.

As part of this project, we aim to capture the experiences of students who balance their studies with providing care (e.g. physical assistance, emotional support, etc.), as well as the perspectives of the care recipients themselves.

### LET'S TALK ABOUT:

- How students manage to balance their studies with care responsibilities?
- What opportunities and challenges are associated with their dual role?
- What solutions and suggestions for improvement can be developed to better support students and the care recipients in this unique life situation?

You would like to be a part of this research project and share your experiences and thoughts? This is your chance to get in touch with Dageni at [Dageni@aru.ac.uk](mailto:Dageni@aru.ac.uk) !

We are looking forward to hearing from you!
